

# INNOVATION NEXUS

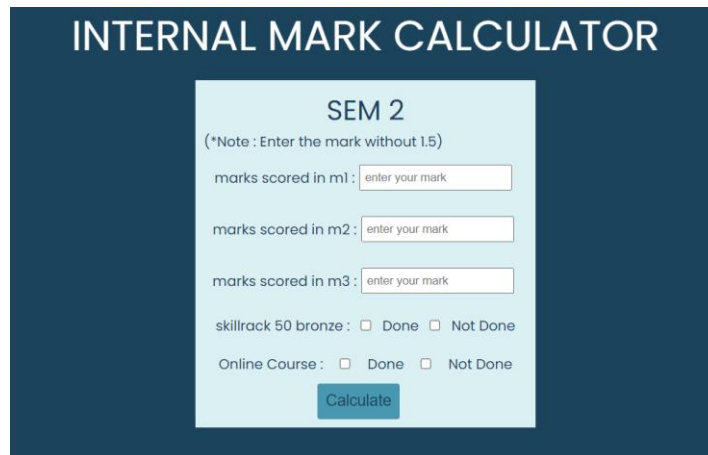

**TITILE :** Internal Mark calculator

**ABOUT :**

**Feature:** Takes the marks scored in Model 1, Model 2, and Model 3 exams as inputs, along with some extra criteria, and calculates the student's internal mark.

**Reason for Development:** Many students pass the external exams but fail in internals. By knowing their internal marks before the semester exam, students can understand how much they need to score in the external exam to pass the subject without any arrears. This website also provides the mark needed in the external exam, giving students a clear idea of the required score before attending the exam.

**Languages:** HTML CSS JAVASCRIPT

The image shows a web form titled "INTERNAL MARK CALCULATOR" on a dark blue background. The form itself is a light blue rectangle. At the top of the form, it says "SEM 2" and includes a note: "(\*Note : Enter the mark without 1.5)". There are three input fields for "marks scored in m1:", "marks scored in m2:", and "marks scored in m3:", each with a placeholder "enter your mark". Below these are two checkboxes: "skillrack 50 bronze : ☐ Done ☐ Not Done" and "Online Course : ☐ Done ☐ Not Done". At the bottom of the form is a blue "Calculate" button.
